

# Poster Presentations

**12:00-1:00pm**

## **“Pericardial Large B Cell Lymphoma as a Manifestation of HIV Immune Reconstruction Inflammatory Syndrome”**

Presenter: Jimmy Fernandez, M.D.  
Collaborators: David Yi Zhang, M.D.  
Fredy Chaparro-Rojas, M.D

## **“Rhodotorula and Methicillin Resistant Staphylococcus Aureus Native Hip Joint Septic Arthritis and Osteomyelitis”**

Presenter: Fredy Chaparro-Rojas, M.D.  
Mentor: Larry Bush, M.D.  
Collaborator: Maria Perez, M.D.

# Research Presentations

1:45-1:55 pm

## **“Achieving Optimal Glucose Control on the Medical Wards”**

Diabetes is becoming more prevalent in the United States and throughout the world. This is an insulin protocol; that is going to show if one can achieve better glucose control with a weight based aggressive protocol or with the standard sliding scale insulin.

Presenter: Nathaniel Fleischner, M.D.  
Mentor: Randy Gershwin, M.D.

1:55-2:05

## **“Multiple Myeloma”**

Autologous Hematopoietic Stem Cell Transplantation (HSCT) is the process of utilizing one's own hematopoietic progenitor cells from peripheral blood to restore normal hematopoiesis after myeloid insult (iatrogenic or tumor related). This study is a retrospective review of approximately 18 Multiple Myeloma patients who have undergone Autologous Stem Cell Transplantation

Presenter: Jhawed Khayoumi, M.D.  
Mentor: Robert Jacobson, M.D.

2:05-2:15

## **“Day of Admission and Clinical Outcomes of Patients Hospitalized for Heart Failure”**

Heart failure (HF) is among the leading cause of hospitalizations. Our aim is to evaluate the relationship between the day of week patients are hospitalized for HF and death rate; length of stay (LOS) and rehospitalization rate.

Presenter: Aman Shukla, M.D.  
Mentor: Randy Gershwin, M.D.

2:15-2:25

### **“Medical Outcomes and Quality of Life Study after Percutaneous Coronary Intervention in Nonagenarian”**

There is an increased prevalence of American nonagenarians, having coronary interventions.

Our aim is to evaluate outcomes, survival and quality of life after Percutaneous Coronary Intervention, in the 90 years and older population.

Presenter: Omid Zad  
Mentor: Robert Chait, M.D.  
Collaborators: Aman Shukla, M.D., T. Mitchell, M.D.

2:25-2:35

### **“Duration of Hypothermia in Out of Hospital Cardiac Arrest”**

Sudden cardiac death is responsible for over 400,000 deaths in the United States each year. Recently it has been shown that survival can be improved after successful resuscitation, with the use of post resuscitation hypothermia.

Presenter: Rajesh Ramineni, M.D.  
Mentor: Robert Chait, M.D.

# Vignette Presentations

2:35-2:45

## **“Spontaneous Coronary Artery Dissection”**

Identifying Spontaneous Coronary Artery Dissection (SCAD) as an under diagnosed etiology of acute coronary syndrome (ACS).

This review of two cases of SCAD is used to describe this rare entity, define probable etiologies and mechanisms; as well as address possible management approaches.

Presenter: Yehia Abdelwahed, M.D.  
Mentor: Robert Chait, M.D.

2:45-2:55

## **“Sepsis in Hepatic Syndrome”**

This case was 21year old Guatemalan male, who was brought to the emergency room by friends. They related that he had not been feeling well, and in two days, his symptoms progressed to fever, vomiting, confusion, and difficulty waking.

Presenter: Jennifer Adigun, M.D.

**~BREAK~**

**3:10- 3:20**

### **“Pancreatic Carcinoma with Cutaneous Metastases”**

Pancreatic cancer remains a highly morbid disease with more than eighty percent of patients presenting with locally advanced disease or metastasis.

A 51 year male presented with nausea, vomiting, epigastric pain, and weight loss.

Presenter: Susmitha Apuri  
Mentors: Dr. Stephen Steinberg, M.D.,  
Collaborators: Genevieve Kuruvilla, M.D., Amarghan Mostafavi, M.D.,  
Fatemeh Mousavi, M.D.

**3:20-3:30**

### **“Pancytopenia and Hepato-Splenomegaly”**

A 66 year old male presents with dyspnea on exertion. He is found to have a rare disorder with unknown incidence in the general population.

Presenter: Angela Castillo, M.D.  
Mentor: Araneo Miguel, M.D.

**3:30-3:40**

### **“Polymicrobial Abdominal Aortic Endograft Infection, Secondary to Aortoenteric Para-Prosthetic Erosion”**

As the population of the United States ages, the incidence and prevalence of abdominal aortic aneurysms will increase.

We report a polymicrobial infection complication of a remotely placed Endovascular stent graft due to an aorto-enteric para-prosthetic erosion in a 79 year old male 8 yrs after placement

Presenter: Yasmeen Khan, M.D.  
Mentor: Larry M. Bush, M.D., Jack Zeltzer, M.D. , Maria T. Perez, M.D.  
Collaborators: Omid Zad, M.D., Fredy Chapparo-Rojas, M.D., Syed Hasan, M.D

**3:40-3:50**

### **“Late In Stent Thrombosis in Drug Eluting Stents”**

A 75 year old male with past medical history of myocardial infarction and status post drug eluting stent placement (2 years ago prior), was admitted to the emergency room complaining of chest pain. The patient had been compliant with ASA and Plavix ® therapy for 1 year after stent placement.

Presenter: Jhawed Khayoumi, M.D.  
Mentor: Robert Chait, M.D.  
Collaborator: Jennifer Adigun, M.D.

**3:50-4:00 pm**

### **“Ventricular Noncompaction with Polycystic Kidney Disease and Hypertrophic Cardiomyopathy”**

Non compaction of ventricular myocardium (NVM) is a relatively new diagnostic entity described as an arrest in the process of compaction of myocardial fibers resulting in a prominent trabecular network and deep intertrabecular recesses.

A 37 year old male was seen in the cardiology clinic for evaluation of a heart murmur noted during a regular physical examination. Pt was asymptomatic with an active lifestyle.

Presenter: Rajesh Ramineni, M.D.  
Mentors: Alex Chernobelsky, M.D.  
Roberto Von Sohsten, M.D.

**4:00-4:10**

**“A Rare Case of Severe Mitral Regurgitation, Secondary to Papillary Muscle Infarction in the Setting of Normal Coronaries”**

A 73 years old female with past history of asthma and giant cell arteritis presented with one episode of severe chest pain 5-6 days prior, complicated by progressive worsening shortness of breath.

Presenter: Aman Shukla, M.D.  
Mentor: Steven Borzak, M.D.

**4:10-4:20**

**“Patent Foramen Ovale and Pulmonary Embolus”**

This is a case of a patient who had a good outcome after a surgical embolectomy for acute pulmonary embolus.

A 39 year-old female with no significant past medical history was brought to the emergency room by emergency medical services complaining of left-sided weakness.

Presenter: Alicia Williams, M.D.  
Mentor: Steven Borzak, M.D.  
Collaborator: Eric Kramer, M.D.
